## Program information

### Course content

Hard and soft tissue management become besides different implant insertion techniques more and more important. Building up a safe and stable bone fundament for receiving an implant and creating a healthy periimplant soft tissue for aesthetic outcomes. In this course the lecturers focus on techniques how to build up and protect tissues and how to handle failures. Using the example of clinical cases the speakers present solutions and tricks for different situations.

### Course overview

#### „Hard tissue management“

- Classification of bone defects. Theoretical background.
- Horizontal augmentation (incl. Osseo<sup>Plus</sup> Transfer)
- Vertical augmentation and sinus lift procedures
- Soft tissue augmentation

#### „Soft tissue management“

- Incision techniques in dental implantology
- Techniques of implant exposure
- Soft tissue management in the aesthetic zone
- Preparation of the emergence profile: What are the tasks of the surgeon? What do the prosthodontists need to know?
- How to treat soft tissue dehiscences around dental implants?

#### Multi<sup>Plus</sup> Concept

- Background concept information
- Clinical application – tips and tricks
